## (54) IMAGE DISPLAY MEDIUM

### (57)Abstract:

PROBLEM TO BE SOLVED: To maintain a medium to have high contrast and to hardly cause irregularity in image even when the medium is repeatedly used for a long time.

SOLUTION: The image display medium 1 contains a first substrate 3 which transmits light, a second substrate 6 disposed facing the first substrate 3, and first particles 4 and second particles 5 different in colors, consisting of mother particles and fine particles depositing on the surfaces of the mother particles and enclosed between the first substrate 3 and the second substrate 6. The first particles 4 are charged positively, and the second particles 5 are charged negatively.

## LEGAL STATUS

[Date of request for examination] 14.06.2004

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
